Néhány folyóiratkereső rendszer felsorolása és példa segítségével vázlatos bemutatása Sasvári Péter

DOI: http://doi.org/10.13140/RG.2.2.28994.22721

A tudományos közlemények írása minden szakma művelésének alapja, a tudás, a szakismeret továbbadásának legjelentősebb módja. A történelem során a tudás, az ismeretek terjesztése nem mindig volt kívánatos a kiváltságos helyzet elvesztésének félelme miatt. Ma mindenki törekszik szakismereteit továbbadni, az oktatás rangot nyert, ma már a legtöbb területen kiváltságos helyzetet nem az adja, amit el tudok rejteni.

A benyújtott közlemények egy részét megjelentetik, másik részét elutasítják a folyóiratok. Az elutasítások egyik fő oka, hogy a benyújtott dokumentumok témái az adott folyóirat esetén **nem relevánsak**, még akkor sem, ha maguk a benyújtott közlemény kiváló egy másik területen. A közlemények témájához jól illeszkedő folyóiratokba való beküldéssel – több esetben - elkerülhető ez a probléma. Egy olyan informatikai rendszer, amely képes arra, hogy olyan folyóiratokat javasoljon, amelyekben hasonló cikkeket tettek közzé segíthet a szerzőknek abban, hogy hova adják be a közleményeiket. Ezek a folyóiratkereső rendszerek a legtöbb esetben egy szabadon elérhető online szolgáltatásként jelennek meg.

A legtöbb folyóiratkezelő rendszernek angol címre és absztraktra van szüksége.

Példa a folyóiratkezelő rendszerek használatára

Mind a 7 folyóiratkezelő rendszert az alábbi címmel és absztrakttal teszteltem:

• Közlemény címe

Freedom of arts as an independent fundamental right in the Hungarian legal system

• Közlemény absztraktja

The paper discusses the issue whether art and works of art created by artists can be assessed using legal means. The paper provides an overview of the different Hungarian constitutional provisions governing artistic freedom from 1949 to the present, and examines the possible components of freedom of arts as a fundamental right, within the confines of the Hungarian legal system. According to the author, the subjective side of the artistic freedom integrates into the fundamental right of freedom of expression, ie artistic expression is free, but it does not require a separate, specific protection under constitutional law. However, the specificities of artistic expression as factors influencing the scope of the freedom of expression might be taken into account, e.g. symbolic speech, the specificities of a genre or the time elapsed since publication). Hence, works of art and literary pieces are to be treated as specific, unique forms of opinions – they are presented as a form of freedom of expression but this does not go beyond the boundaries of freedom of expression as a fundamental right. At the same time, the regulation of art, irrespective of this, might be justified even in the Fundamental Law. Setting requirements for the state (the objective obligation of the state to safeguard the institutions of fundamental law) is a precondition for the birth and preservation of works of art, which constitutes the objective side of artistic freedom without any specific subject and denotes its specific constitutional content But, an appropriate level of protection for freedom of expression ensures that this recognition should not have any detrimental consequences for freedom of arts.

Human Affairs

Human Affairs: Postdisciplinary Humanities & Social Sciences Quarterly (founded in 1990 as Human Affairs) is an international journal for humanities and social sciences published in English by the Slovak Academy of Sciences, Slovakia. It aims to bring together contributions from all traditional and non-traditional fields of humanities and social sciences which relate to crucial contemporary human affairs. The underlying editorial strategy is to advance human self-understanding and communication via publishing innovative theoretical, interpretative, critical and historical contributions transcending traditional disciplinary and cultural frontiers. By publishing original and theoretical articles, empirical studies and their interpretations, reviews and notes of both national and international authors, Human Affairs: Postdisciplinary Humanities & Social Sciences Quarterly serves the mission of fostering multicultural and international conversation concerning the whole range of human and social issues.

Medicine, Health Care and Philosophy

A forum for international exchange of research data, theories, reports and opinions on bioethics, and the philosophy of medicine and health care Covers history, ethics, anthropology, epistemology, logic, metaphysics and more, as related to health Official journal of the European Society for Philosophy of Medicine and Health Care Medicine, Health Care and Philosophy: A European Journal is the official journal of the European Society for Philosophy of Medicine and Health Care. It provides a forum for international exchange of research data, theories, reports and opinions on bioethics, and the philosophy of medicine and health care in general. The journal promotes interdisciplinary studies, and stimulates international exchange. Particular attention is paid to developing contributions from all European countries, and to making accessible scientific work and reports on the practice of health care ethics, from all nations, cultures and language areas in Europe. The journal covers history, ethics, anthropology, epis

Welcome to Jane

Have you recently written a paper, but you're not sure to which journal you should submit it? Or maybe you want to find relevant articles to cite in your paper? Or are you an editor, and do you need to find reviewers for a particular paper? Jane can help!

Just enter the title and/or abstract of the paper in the box, and click on 'Find journals', 'Find authors' or 'Find Articles'. Jane will then compare your document to millions of documents in *PubMed* to find the best matching journals, authors or articles.

Keyword search

Instead of using a title or abstract, you can also search using a keyword search, similar to popular web search engines. Click <u>here</u> to search using keywords.

Beware of predatory journals

JANE relies on the data in PubMed, which can contain papers from predatory journals, and therefore these journals can appear in JANE's results. To help identify high-quality journals, JANE now tags journals that are currently indexed in MEDLINE, and open access journals approved by the Directory of Open Access Journals (DOAJ).
