Prerequisite(s) for the course	Angol szaknyelv 1' (for Hungarian students)

Semester	Both
Course description	Introduction to Political Science is a course for students interested in understanding the logic of modern political systems. By the end of the semester students will have developed a basic understanding about relevant concepts of political science including the frequently used terms. Since a marked emphasis will be put on interactive methods, students will also be furnished with the adequate analytical skills to apply lexical knowledge. Beside discussions, simulation exercises and student presentations, a parliamentary visit and guest lectures will be included in the semester.
Learning outcomes and course competences	Upon completing the course and having met the course requirements students will: - understand the basics of political science and the logic of modern political systems with a marked emphasis on the topics covered throughout the semester - be able to apply certain theoretical concepts acquired (left-right scale) - gain practical experience with regard to the use of political science terminology through simulations and interactive methods
Course topics	1) Politics and Political Science I.: Basic Concepts and Terminology - Self Assessment 2) Politics and Political Science II.: Approaches, theories, methods 3) General Framework: Political systems (structures, functions, elements) 4) Political ideologies I. 5) Political ideologies II. 6) Political ideologies III. 7, Political cleavages and the left-right scale 8) Political culture 9) Political behaviour, political participation, voting behaviour 10) Political parties and party systems 11) Electoral systems 12) Governmental systems 13) Regime types I.: Autocracies (authoritarian and totalitarian regimes) 14) Regime types II.: Democracies 15, Summary of the course - Self Assessment 2.
